Holistic development of students is possible only when co-curricular activities are creditably linked with curricular activities in the school curriculum.

Co-curricular activities essentially take place outside a typical pen-pencil classroom experience and provide ample chance to students to learn beyond subjects.

These activities are the non-verbal ways to express one's feelings, share ideas as well as effectively contribute to the cause of event.

CBSE calendar events are essentially planned to spread awareness regarding the importance of different days and events of the year.

Activities held in the school are not merely for entertainment but for educating the students on different issues concerning them.

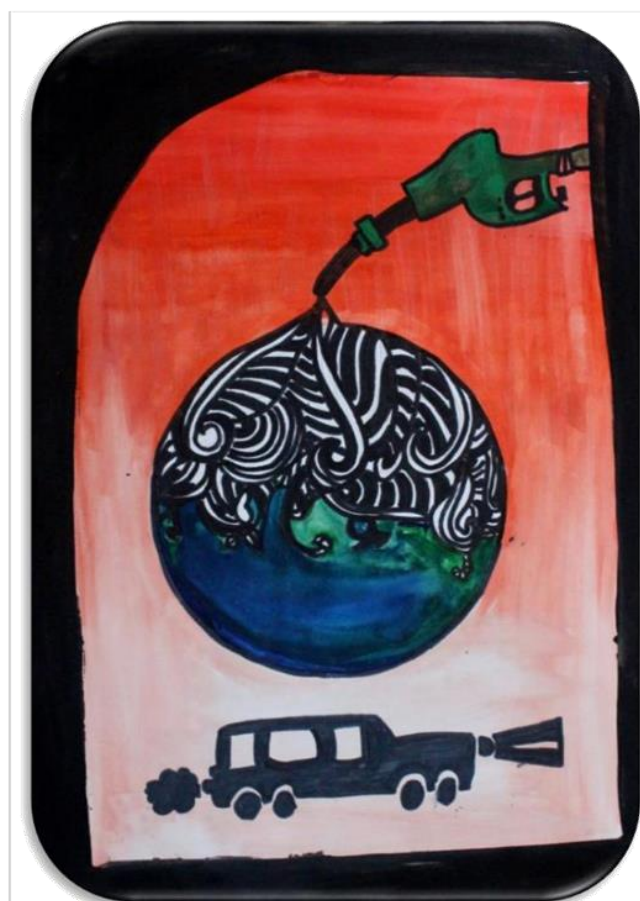

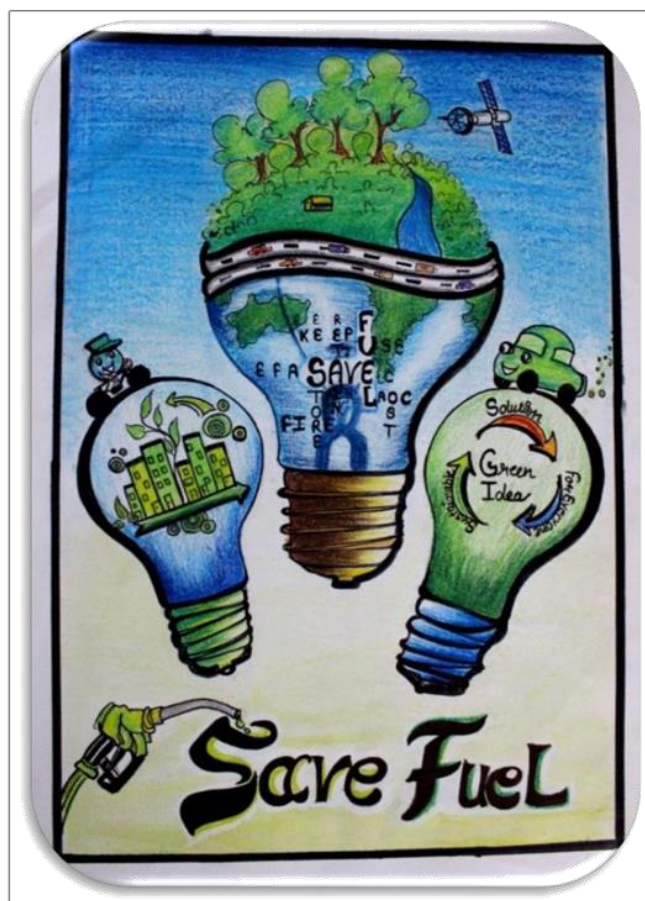

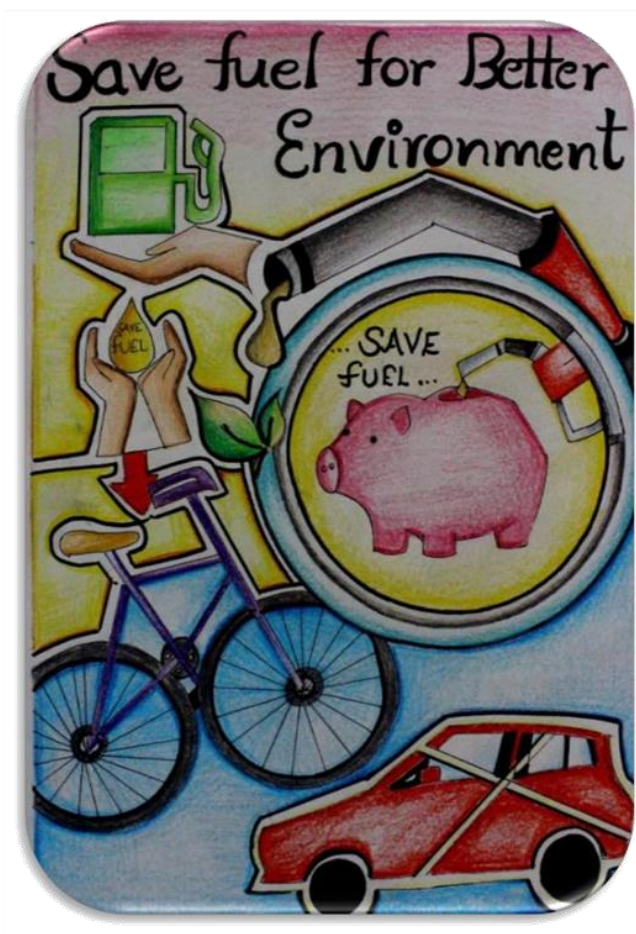

The school gives due importance to these events and various activities are conducted to create awareness among students by making them a part of celebration of such events.
